PERFORMANCE:

Professional Experience (PHS or other Uniformed Service Section):

Senior Regulatory Program Manager

Senior Program Management Officer Consultant, 0-6

Pillar ?

AUG XXXX to Present

FDA/Center for Drug Review and Evaluation/Office of Oncology Drug Products
Silver Spring, MD

Primary duties

- Provide regulatory guidance to Pharmaceutical industry, scientists, congressional inquiries and patients regarding new drugs to treat cancer.
- Coordinate the legal and scientific issues during the review of New Drug Applications (NDA) and Investigational Drug Application (IND) submissions.
- Effectively manage resources from all disciplines, ensuring the timely review in accordance with federal regulations.

Collateral duties

- Vice-Chair Oncology Coordinating Committee Pharmacogenomics Subgroup (involving FDA-wide staff), supporting the FDA Pharmacogenomics initiative
- FDA representative for the PhRMA/FDA oncology working group

Accomplishments/Impact

- **Successfully obtained written agreements** between FDA and Japan to allow for FDA's sharing of information with a foreign regulator. This accomplishment implemented the procedure for international sharing of confidential review documents, was adopted by the Agency and greatly improves communications between FDA and foreign regulators and expedited the review of drug applications.
- **Technical advisor** for the FDA Cancer Drug Development Patient Consultant Program. This program allows cancer survivors into the drug development trial design process to offer the patient point of view in clinical trial design.
- **Promoted and coordinated a cross-discipline** program for recognition and reward of Division of Oncology Drug Products staff.

This effort resulted in recognition of both civilian and PHS awards.

- **Developed the resource for industry** titled "Best Practices for Submission of NDAs to the FDA". This allowed insight to improving the NDA submission process resulting in less time spent on fixing poorly put together submissions.

**Temporary Duty Assignment Senior Program Management Officer
Consultant, 0-6**

Pillar ?

MAR XXXX to SEP XXXX

FDA/Center for Drug Review and Evaluation/Division of Oncology Drug
Products
Rockville, MD

Primary duties

- Provided regulatory guidance to Pharmaceutical industry, scientists, congressional inquiries and patients regarding new drugs to treat cancer; coordinated the legal and scientific issues of New Drug Applications (NDA) and Investigational Drug Application (IND) submissions. Effectively managed the resources from all disciplines, ensuring the timely review in accordance with federal regulations.

Collateral duties

- FDA Representative: FNIH Biomarkers Consortium – Cancer Steering Committee

Accomplishments/Impact

- **Expedited Drug Approval:** Successfully improved collaboration and internal and external communications during the drug approval process resulting in approving the drug Gleevec for patients with Chronic Myeloid Leukemia in half the time

Senior Program Management Officer, Billet 0-6

Pillar ?
