REAR ADMIRAL RANDALL J.F. GARDNER, P.E.  
CHIEF ENGINEER OFFICER, USPHS

Welcome to the Engineer Professional Advisory Committee (EPAC) Mentoring webpage. Please take a moment to get familiar with the materials on this page and its contents. The engineer volunteers that put this information together are dedicated to improving the growth and success of the experiences and careers of as many Public Health Service (PHS) engineers as possible. The benefit of the mentoring program is really up to the efforts of the mentors and protégés that decide to use the information on this webpage to develop relationships and to constantly work to improve themselves and the PHS engineering experience. If there are any suggestions on how to improve we would like to hear them. Also, please consider becoming a volunteer in any of the career development activities of the EPAC. The more volunteers we have the easier it becomes to spread the work and to produce more meaningful materials.

If you have read my biography you know I have truly benefitted from the relationships developed over my career; and as Chief Engineer, I will continue to develop new relationships to benefit the Engineer Category. I wish you the best in your endeavors as we continue to support the PHS.

Regards,

RADM Randall J.F. Gardner, P.E.

Chief Engineer, USPHS
